

Invisible Access Panel System

Kikukawa's access panel system blends seamlessly into a ceiling, with concealed hardware and frames. Without visible hardware, the surfaces are clean, flush and continuous. The solution is sought for its elegance in high-end construction projects. Accommodates thin joint details and high-quality metal finishes.

Features

- Virtually indistinguishable access panel.
- Opens and closes with a single touch.
- Applicable to thin joint design details. Unlocks with a thin plate.
- Applicable to any metal including stainless steel and other dense metals.
- Bespoke services available from designing details to installation.
